

SMART EXPIRY

YOUR FOOD WASTE COMPANION

AND MORE

Have you ever bought groceries, only to find them spoiled or expired before you had a chance to use them?

Have you ever stood in front of your fridge wondering what to do with ingredients that are about to go bad?

Do you know that we waste more than 1 billion meals every day as hundreds of millions go hungry?

CNN. (2024, March 27). About a third of the world's food is wasted while millions go hungry, UN says. CNN. https://edition.cnn.com/2024/03/27/climate/un-food-waste-one-billion-meals-intl/index.html#:~:text=In%20total%2C%20about%20a%20third,million%20are%20affected%20by%20hunger

Have you ever felt overwhelmed by trying to sort your waste correctly in a new country?

If you could reduce your food waste and save money at the same time, would you do it?

TARGET PERSONA

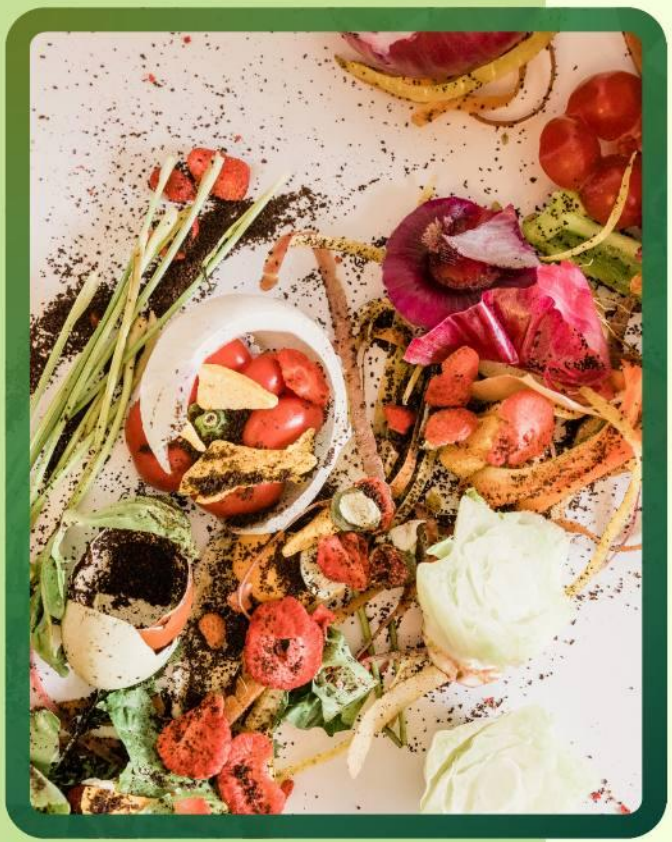

Meet Emily

Emily is originally from Canada and is pursuing a Master's degree in Environmental Science.

She has lived in 3 different countries over the past four years for her education, including Spain and the Netherlands. Each move comes with challenges, such as adjusting to **new languages**, **unfamiliar grocery stores**, and **different food labeling systems**.

Emily **cares deeply about sustainability** and **reducing her environmental footprint**, but managing her groceries in new countries often leads to unintentional food waste.

PAINS

Undesired outcomes

Spoiled groceries: forgetting expiration dates, leading to wasted food
Wasted money: throwing away food and feeling the financial impact
Overbuying: purchasing items already at home

Obstacles

Recycling confusion: struggling to understand local recycling rules after moving to a new place
Storage issues: not knowing the best way to store certain foods to maximize their freshness
Time: busy schedules making it hard to track groceries and plan meals

Risks

Environmental impact: feeling guilty about contributing to global food waste and pollution through improper recycling
Responsibility: worrying about wasting money on groceries that go unused or even paying a fine for unsustainable habits

GAINS

Required

Food management made easy: automatically track expiration dates and send reminders to minimize waste
Streamlined shopping: create smart grocery lists that account for what's already in stock and expired
Localized recycling guidance: tailor recycling instructions based on the user's location

Expected

Time efficiency: save hours spent manually organizing, planning meals, and managing groceries
Money savings: reduce overspending by avoiding impulsive purchases and wasted food

Unexpected

Improved family collaboration: share lists and plans with family members
Sense of accomplishment: track personal progress on food waste reduction and sustainability goals
Eco-conscious living: feel empowered by reducing food waste and following sustainable practices

CUSTOMER JOBS

Functional

Track the **expiration dates** of groceries to prevent spoilage.
Plan meals based on ingredients already available.
Automate grocery list creation based on products in stock and typical shopping habits.
Understand and **follow local recycling rules.**
Learn **how to store groceries** effectively to maximize freshness.

Social

Demonstrate **eco-consciousness and responsibility** to friends and family.
Share achievements like **reducing food waste** or saving money on **social media.**

CUSTOMER JOBS

Emotional

Avoid the **guilt** associated with **wasting food** and contributing to environmental damage.
Reduce **stress** from **last-minute meal planning** or rushing to buy **forgotten groceries.**
Minimize the **stress** of going to the grocery store **unprepared** and making **impulsive buying decisions.**

Supporting

Tracking sustainability progress: monitoring waste reduction and eco-impact.
Sharing with household: collaborating on lists and meal plans with your neighbors.

TRACK SAVE SUSTAIN

A user-friendly app to track expiration dates, reduce food waste and recycle smartly

From cart to recycling
We've got you Covered!
