Product Requirements Document

Easy Walks Near Paris

A content-driven WordPress website for easy, stress-free nature walks within two hours of Paris.

Document owner	Website / content project team
Primary product type	Editorial travel website built on WordPress (Inspiro appearance)
Target launch scope	MVP with core discovery pages + 12 curated walk guides
Version	v1.0 - PRD draft

Product vision: *Help students, expats, and visitors leave Paris for a half-day or full-day walk without transport stress, difficult hiking logistics, or information overload.*

1. Product overview

Easy Walks Near Paris is a website that curates beautiful, beginner-friendly walks reachable by public transport from Paris. The experience is positioned as easy outdoor escape rather than technical hiking. The product combines discovery, reassurance, and practical planning in one place.

Problem statement

- Many people in Paris want fresh air and nature but do not know where to go without a car.
- Existing hiking resources often feel too advanced, too fragmented, or not adapted to international users.
- Transport instructions, safety expectations, and seasonal tips are rarely presented in one simple journey.
- Newcomers need confidence: they want places that feel beautiful, easy, and realistic for a weekend plan.

Proposed solution

- A content-first website with curated walk pages that combine route inspiration, transport instructions, walk difficulty, packing advice, and nearby cultural stops.
- A homepage that quickly communicates the value proposition and helps users start by vibe, season, or travel effort.
- Simple navigation with pages such as Home, Start Here, All Walks, individual walk guides, and About.
- Light community touchpoints through Instagram or TikTok content showcasing real walks and user-generated moments.

Business / project goals

Goal	Why it matters	How success is seen
Clarify the brand promise	Visitors should instantly understand that the site is about easy walks, not demanding hikes.	Low bounce from homepage, strong click-through to guide pages
Reduce planning friction	Users should find transport, route, and practical tips in one place.	High engagement on guide pages and transport sections
Build editorial credibility	The site should feel curated, useful, and trustworthy for newcomers.	Repeat visits, social saves/shares, positive qualitative feedback
Create a scalable	A repeatable guide	Fast publishing process

content base	template enables growth beyond the first 12 walks.	and consistent page quality

Non-goals for MVP

- Building a route-planning engine or dynamic itinerary builder.
- Providing highly technical hiking maps, GPX downloads, or advanced trekking advice.
- Launching a full newsletter or membership product at day one.
- Covering all destinations around Paris; the first release focuses on a curated, manageable set.

2. Users and jobs to be done

Primary audience

- International students living in Paris or the Paris region.
- New expats and young professionals who want low-effort weekend ideas.
- Visitors or friends of locals looking for an easy day trip mixing nature and culture.

Core user needs

- Find a walk that feels accessible, pretty, and worth the trip.
- Understand exactly how to get there by train or other public transport.
- Know whether the walk is truly easy, how long it takes, and what to bring.
- Feel reassured about the atmosphere, safety, and value of the destination.

Persona	Context	Pain point	What they need from the site
Lina, 22	International student, no car, small budget	Does not know which walks are realistic from Paris	Fast reassurance and easy transport instructions
Thomas, 27	Young expat, free on Sundays	Wants nature without long planning or hard hiking	A simple shortlist by vibe and time
Maya, 24	Hosting friends visiting Paris	Needs one day-trip that feels memorable and photogenic	A guide with scenery, local stops, and route tips

3. MVP scope and information architecture

Core pages in MVP

ID	Page / module	Purpose	Key content

P1	Homepage	Explain the promise and help users start fast.	Hero section, value proposition, featured walks, choose-your-vibe cards, social proof, Instagram/TikTok teaser
P2	Start Here	Guide first-time visitors who are unsure where to begin.	How the site works, best first walks, practical tips, audience reassurance
P3	All Walks	Offer a browsable archive of all available guides.	Grid/list of walks with filters such as vibe, season, travel effort, and scenery
P4	Walk guide template	Deliver the complete editorial experience for each destination.	Summary card, route highlights, transport steps, difficulty, timing, map embed, nearby extras, tips
P5	About	Build trust around the brand and explain the editorial angle.	Mission, who it is for, why easy walks, practical philosophy
P6	Footer utility pages	Ensure baseline trust and compliance.	Contact, privacy policy, terms, image credits where relevant

Recommended navigation logic

- Home = inspiration and quick decision support.
- Start Here = orientation page for first-time users who want the easiest entry point.
- All Walks = full content library for browsing and comparison.
- Guide pages = the final planning destination where all practical information is concentrated.

Walk guide content template

- Walk title and one-sentence promise.
- Quick facts block: travel time, walking time, difficulty, best season, ideal for.
- How to get there from Paris in simple steps.
- What to expect on the route: scenery, terrain, atmosphere, and effort level.
- Practical notes: shoes, water, weather, toilets, cafés, or safety reminders.
- Optional cultural extension such as village stop, château, viewpoint, or lake.
- Map / route visual and strong photography.

4. Functional requirements

ID	Requirement	Priority	Acceptance criteria
FR-1	Users must understand the site value proposition within the first screen on mobile and desktop.	Must	Hero copy clearly explains easy walks near Paris by public transport.
FR-2	Users must be able to browse all walk guides from one archive page.	Must	All Walks page lists all published guides with consistent cards.
FR-3	Each guide page must include travel effort, walk difficulty, and transport instructions.	Must	Those fields appear in the upper section of every guide.
FR-4	Users should be able to discover walks by mood or use case.	Should	Homepage or archive contains categories such as forest, lake, village, viewpoint.
FR-5	The site should showcase visual inspiration from social channels.	Should	Homepage or footer includes a curated Instagram/TikTok block or CTA.
FR-6	Editors must be able to publish new guides using a repeatable template in WordPress.	Must	A reusable content structure exists for all future walk pages.
FR-7	Core pages must be readable and usable on mobile.	Must	No essential planning information is hidden or broken on smaller screens.
FR-8	The site should support basic email or social follow conversion points.	Could	A CTA module can direct users to Instagram, TikTok, or subscription.

Non-functional requirements

- Tone must remain simple, warm, and reassuring rather than technical.
- Pages should load cleanly with large imagery but without overwhelming the reader.
- Information hierarchy must prioritize scanability: summary first, details second.
- Brand identity should feel calm, outdoorsy, and accessible.

5. Content and editorial requirements

Initial content package

Content type	Description	Target quantity for MVP
Walk guides	Destination pages built with the same editorial template.	12
Homepage modules	Hero, featured walks, category cards, trust copy, social CTA.	1 set
Orientation content	Start Here page for first-time visitors.	1 page
Brand story	About page and core mission explanation.	1 page
Utility content	Contact / privacy / legal basics.	3-4 pages

Editorial principles

- Write for non-experts: avoid hiking jargon and explain transport simply.
- Always answer the hidden question: 'Can I realistically do this from Paris without stress?'
- Balance inspiration with utility: every beautiful description should be followed by practical reassurance.
- Use consistent labels for difficulty, duration, and travel effort so comparisons feel easy.
- Design content for skimming first, then detailed reading.

Visual / brand direction

- Photography should show calm paths, greenery, water, villages, and realistic day-trip moments.
- The visual identity should feel clean and editorial rather than rugged or extreme.
- Social content should reinforce the promise of simple escape: short reels, route glimpses, and user photos.

6. Success metrics

Metric	Why it matters	Target direction
Homepage click-through to guides	Shows whether the positioning and discovery modules work.	Increase
Average engaged time on guide pages	Signals usefulness of editorial and practical content.	Increase

Scroll depth on guide pages	Indicates whether visitors reach transport and practical sections.	Increase
Return visits	Reflects trust and ongoing relevance.	Increase
Social follows / social clicks	Measures early community connection.	Increase

7. Delivery approach, risks, and dependencies

Suggested phase plan

Phase	Focus	Output	Priority
1	Foundation	Homepage structure, navigation, page templates, brand copy direction	Critical
2	Core content	Publish first walk guides and complete Start Here / About pages	Critical
3	Growth layer	Archive refinements, SEO polish, and extra guides	Important

Key risks

- The brand could be confused with hiking if wording or imagery becomes too technical.
- Guide quality may become inconsistent if the content template is not strict enough.
- Transport information can age quickly and should be reviewed before publication.
- Too many homepage modules could weaken clarity; the value proposition must stay simple.

Dependencies

- WordPress setup and Inspiro-compatible layout decisions.
- Reliable photography or visual assets for the homepage and guide pages.
- Editorial research for transport instructions, route realism, and seasonal relevance.
- A repeatable publishing workflow for future destinations.

> **Bottom line:** The MVP should make choosing an easy walk feel effortless. The product succeeds when a visitor can land on the site, feel reassured, pick a destination, and know exactly how to do the trip from Paris.
